

Case Studies: Real Results

Documented Transformation Outcomes Through the Sales Mastery Model

CASE STUDY #1: 120-BED SKILLED NURSING FACILITY

The Challenge:

A 120-bed SNF was averaging only 2-3 hospice referrals per month despite having 40+ residents with life-limiting conditions. Staff reported feeling uncomfortable initiating hospice conversations.

Sales Mastery Model Application:

- DISCOVERY: Learned their referral process was ad-hoc with no systematic screening
- CONNECTING: Director of Nursing wanted to improve family satisfaction scores
- GUIDING: Proposed monthly screening rounds + staff training program
- COMMITMENT: Secured 6-month pilot with monthly reviews

The Results (6 Months):

300% INCREASE in monthly hospice referrals (2-3 to 8-10/month)

- Family satisfaction scores increased from 3.2 to 4.6 (out of 5)
- Hospital transfer rate for end-of-life residents decreased 45%

CASE STUDY #2: 280-BED REGIONAL HOSPITAL

The Challenge:

Average length of stay on hospice was only 5 days, indicating late referrals. This led to poor patient/family experience and missed quality metrics.

Sales Mastery Model Application:

- DISCOVERY: Learned hospitalists lacked confidence in prognostic indicators
- CONNECTING: Chief Medical Officer valued reducing readmissions
- GUIDING: Proposed EMR-integrated triggers + hospitalist training
- COMMITMENT: Secured 24-hour hospice admission guarantee partnership

The Results (12 Months):

460% INCREASE in average hospice length of stay (5 to 28 days)

- Readmission rate for discharged hospice patients: 0%
- Estimated annual cost savings: \$420,000
