

Decision Trees & Frameworks

Strategic Navigation Through the Healthcare Sales Mastery Model

THE HEALTHCARE SALES MASTERY MODEL

Use this 4-stage framework to track every account and guide your next action:

1

DISCOVERY

Learning about the needs and operations of the account or contact

2

CONNECTING

Learning the individual needs of the account or contact

3

GUIDING

Aligning their needs to your features and benefits

4

COMMITMENT

Closing and asking for the business

STAGE ADVANCEMENT CRITERIA

Ready to move from Discovery to Connecting when:

- You understand their patient population and care model
- You know their current referral process
- You have identified key decision-makers

Ready to move from Connecting to Guiding when:

- You understand their personal priorities and concerns
- They have shared specific challenges they want to solve
- You have built rapport and they view you as a resource

Ready to move from Guiding to Commitment when:

- They see clear alignment between their needs and your solution
- Key objections have been addressed
- All decision-makers have been engaged

OBJECTION RESPONSE FRAMEWORK

1. ACKNOWLEDGE

"I understand..." or "That makes sense..." Validate their concern.

2. CLARIFY

"Help me understand..." Get to the root of the objection.

Address with relevant evidence. Keep it brief and specific.

4. **ADVANCE**

Propose a low-commitment next step within the current stage.

[TIP] CONTINUOUS IMPROVEMENT

After every interaction, document: Which stage is this account in? What do I need to learn/do to advance them to the next stage? This discipline compounds into expertise.
