

SPARTAN COACHING

HOSPICE SALES EXCELLENCE TRAINING

Cold Call Opening Script

Psychology-Backed Approach to Healthcare Decision-Makers

EXECUTIVE SUMMARY

Healthcare administrators receive 40+ calls weekly. Your 30-second opening determines whether they listen or dismiss you. This script cuts through noise by establishing credibility, respecting their time, and positioning hospice referrals as a patient care outcome—not sales.

THE PSYCHOLOGY-BACKED OPENING

"Hi [Name], this is [Your Name] with Spartan Coaching. I know you manage a busy [facility type], so I'll be direct. We help facilities like [similar type] identify eligible patients for hospice care earlier, which improves patient outcomes, family satisfaction, AND regulatory compliance. Do you have 60 seconds for a quick question?"

Why This Opening Works (The Science):

- 1. Social Proof**
Mentioning peers activates comparison—they want to know what competitors are doing
- 2. Multi-Benefit Hook**
Three outcomes appeal to different decision-maker priorities
- 3. Time Respect**
Removing the biggest objection (busyness) before it's spoken
- 4. Question Close**
Creates psychological obligation to respond (reciprocity)
- 5. Credibility Anchor**
"Spartan Coaching" positions you as expert, not vendor

TIER 1 DISCOVERY: BASELINE (First 2 Minutes)

Q1: "How many patients are currently in your care?"

Purpose: Establish census—determines opportunity size

Q2: "What percentage do you estimate hospice-appropriate?"

Purpose: Test awareness. Gap becomes your opening.

Q3: "Do you have a formalized identification process?"

Purpose: Understand current state to position value

TIER 2 DISCOVERY: OPPORTUNITY UNCOVERING

Q4: "In last 90 days, how many transitioned to hospice?"

Purpose: Real numbers vs estimates. Find the gap.

Q5: "Did any miss the optimal window? What happened?"

Purpose: Uncover specific barrier—physician? Family? Process?

Q6: "What's the biggest challenge in identifying candidates?"

Purpose: Get their pain in their own words—use it in follow-ups

ADVANCED OBJECTION HANDLING

Objection #1: "We already work with a hospice partner"

Expert response: "I respect that. Best facilities use multiple partners. We focus on [specific area] where most providers have gaps. Would it make sense to explore where we complement what you're doing?"

Objection #2: "We don't have a need right now"

Expert response: "Most facilities discover they have a gap when looking at data. Would you be open to an assessment showing referral patterns vs. best-practice facilities? No pressure, just data."

Objection #3: "Send me something and I'll review it"

Expert response: "I will send it today. I'll ping you Friday to see if you had questions. That way if needed, I can walk through it in 15 minutes. Does that timeline work?"
