

SPARTAN COACHING

HOSPICE SALES EXCELLENCE

Facility-Type Specific Sales Scripts

HOSPITAL SCRIPT (Shorter Cycle, Higher Acuity)

Pain Point: Patients discharge quickly; referral windows are SHORT (48-72 hours)

"Hi [Name], this is [Your Name] with Spartan Coaching. I know hospital discharge coordination is intense. Quick question: when a patient becomes appropriate for hospice, how many hours from identification to discharge referral are you working with? Most hospitals tell us they have 24-48 hours to get this right, and missing that window costs them."

Hospital-Specific Talking Points:

- We help you identify eligible patients WITHIN 24 hours of admission
- Faster physician certification = faster discharge (reduces LOS, improves metrics)
- Real-time coordination with discharge planners and social workers
- Reduces 30-day readmissions by getting right level of care sooner

SKILLED NURSING FACILITY SCRIPT (Compliance & Revenue Focus)

Pain Point: CMS compliance, therapy utilization, appropriate level of care determination

"Hi [Name], this is [Your Name] with Spartan Coaching. I work with SNFs on something I think you'll relate to: CMS is scrutinizing unnecessary therapy services on patients who should already be on hospice. That's not just a quality issue—it affects your reimbursement. Do you have a formal process for identifying when therapy should stop and hospice starts?"

SNF-Specific Talking Points:

- Identify therapy-appropriate vs hospice-appropriate patients (compliance requirement)
- Reduce unnecessary therapy costs (direct impact on bottom line)
- Better outcomes = better quality ratings = better referral source reputation
- Physician collaboration framework (Medicare requires clear documentation)
- Family satisfaction increases when appropriate care level provided

ASSISTED LIVING SCRIPT (Family-Centric, Values-Focused)

Pain Point: Family hesitancy, end-of-life conversations, desire to do "everything"

"Hi [Name], this is [Your Name] with Spartan Coaching. We work with communities like yours that want to honor residents' wishes at end of life. Many families struggle with the transition from care to comfort—and it's hard to have those conversations without good support. Are you looking to strengthen how your team handles that conversation?"

Assisted Living-Specific Talking Points:

- Support families in dignified end-of-life conversations (brand differentiator)
- Improve family satisfaction scores (directly measurable)
- Reduce unnecessary hospitalizations near end of life
- Train staff in comfort-focused care messaging
- Partnership approach (you + hospice = comprehensive care)
