

# Account Tiering Worksheet

Prioritize Your Territory for Maximum Impact

---

## HOW ACCOUNT TIERING WORKS

Not all accounts deserve equal time. Tiering helps you invest your limited hours where they will generate the most referrals and admissions. Review your tiers monthly and adjust based on results.

## TIER DEFINITIONS

### A Tier: High Value Accounts (Visit Weekly)

- Currently sending referrals or high potential to start
- Strong relationship with key contacts
- High patient volume in your target population
- Typically 8 to 12 accounts in this tier

### B Tier: Growth Accounts (Visit Every 2 Weeks)

- Occasional referrals or growing relationship
- Moderate patient volume with room to grow
- Requires more education or trust building
- Typically 15 to 20 accounts in this tier

### C Tier: Maintenance Accounts (Visit Monthly)

- Low current volume but worth maintaining
- New contacts still being developed
- May move up with consistent effort
- Remaining accounts in your territory

## SCORING CRITERIA

Rate each account 1 to 5 on the following dimensions:

- Current referral volume (1 = none, 5 = consistent high volume)
- Growth potential (1 = maxed out, 5 = significant untapped potential)
- Relationship strength (1 = no contacts, 5 = strong champion)

- Competitive position (1 = locked out, 5 = preferred provider)

Total score 16 to 20 = A Tier. Score 10 to 15 = B Tier. Score below 10 = C Tier.

### TERRITORY DISCIPLINE

The hardest part of tiering is being honest about accounts that consume your time without producing results. If an account has been C Tier for three months with no movement, it may be time to stop visiting and replace it with a new prospect.
