Healthcare Sales Mastery Model - Stage 1: Discovery

THE HEALTHCARE SALES MASTERY MODEL

Every successful healthcare sale follows this proven 4-stage progression. Master each stage before advancing to the next.

1

DISCOVERY

Learning about the needs and operations of the account or contact

2

CONNECTING

Learning the individual needs of the account or contact

3

GUIDING

Aligning their needs to your features and benefits

4

COMMITMENT

Closing and asking for the business

THE SPARTAN 30-SECOND OPENING

Use this proven opening to establish respect and create an opening for discovery:

"Hi [Name], this is [Your Name] with [Hospice Company]. I know you're incredibly busy caring for patients, so I'll be brief. We partner with facilities like yours to ensure patients receive optimal comfort care at the right time. Do you have 30 seconds?"

Why This Opening Works

- Acknowledges their time constraints immediately, building respect
- Focuses on patient outcomes rather than sales language
- Requests minimal commitment, lowering initial resistance

DISCOVERY QUESTIONS

Your goal in Stage 1 is to learn about their operations, processes, and organizational challenges:

- 1 Census Assessment**
"How many patients in your facility would you estimate are appropriate for hospice comfort care?"
- 2 Process Understanding**
"What does your current referral process look like when a patient becomes appropriate?"
- 3 Stakeholder Mapping**
"Who else is typically involved in those care transition decisions?"
- 4 Challenge Identification**
"What challenges do you face in identifying appropriate patients early enough?"

HANDLING COMMON OBJECTIONS

"We already have a hospice partner"

"I respect that relationship. Many of our best partners work with multiple hospice providers to ensure coverage and options for families. What criteria do you use when a family requests a specific provider?"

"Not interested right now"

"I understand completely. Could I send you a 2-minute assessment tool? No obligation - just something that might help identify patients who could benefit from earlier hospice conversations."

SPARTAN PRINCIPLE

Never argue with an objection. Acknowledge, pivot to value, and offer a low-commitment next step. Discipline in your response builds trust.
