WEEKLY ACTIVITY TRACKER

Daily Conversation Logging and Performance Measurement

A structured weekly tracking system for logging referral source conversations, monitoring pipeline progression, calculating conversion metrics, and identifying coaching opportunities.

Weekly Activity Tracker

What Gets Tracked Gets Improved

HOW TO USE THIS TRACKER

Log every live conversation with a referral source contact as it happens. Do not rely on memory at the end of the day. A conversation counts when both of the following are true: you spoke with a live human contact (not a voicemail), and the conversation was related to patient care, referral activity, or relationship development.

At the end of each day, complete the daily summary. At the end of the week, complete the weekly reflection. Review your tracker with your manager or coach weekly. The patterns in your activity data are your most important coaching tool.

KEY METRICS AND WHAT THEY MEAN

Conversations Per Day

This is your primary leading indicator. Research across high-performing hospice sales territories shows that reps averaging 8 or more live referral source conversations per day significantly outperform those averaging fewer than 5. Conversations drive everything downstream.

Conversation-to-Referral Conversion Rate

Calculated as: Referrals received divided by total conversations. A healthy rate is typically 8 to 15%. Below 8% usually indicates a Discovery or Connecting gap. Above 15% often means you have good relationships but may not be seeing enough new accounts to grow.

Referral-to-Admission Conversion Rate

Calculated as: Admissions divided by referrals received. A healthy rate is typically 65 to 80%. Below 65% may indicate clinical eligibility issues, family hesitation, or competitive situations at point of referral. Track this monthly, not weekly, as the sample size is small.

MONDAY

Conversations (check each one as it happens)

WEEKLY SUMMARY AND REFLECTION

Total conversations this week: _____

Total referrals received this week: _____

Total admissions this week: _____

Conversation to referral conversion rate (referrals / conversations): _____

New accounts visited for the first time: _____

Accounts that advanced a stage in the Sales Mastery Model:

Weekly Reflection Questions

What conversation this week went best, and why?:

What conversation went poorly, and what would I do differently?:

Which accounts am I most concerned about and why?:

What is the one thing I will do differently next week?:

THE TRACKING DISCIPLINE

Reps who track consistently outperform reps who do not, independent of any other variable. The data in your tracker is not for your manager. It is for you. It will tell you exactly where your process is breaking down. Trust it more than your gut. Your gut notices patterns too slowly. Your data catches them immediately.
